In today's economic climate, I thought a book on credit management would be a wise choice. This book is not just on handling bad credit problems, it is a GREAT resource on avoiding those problems in the first place! I like that the author, Steve Bucci, is the "former president of the Consumer Credit Counseling Service of Southern New England, former managing director of the Center for Personal Financial Education at the University of Rhode Island" as well as a nationally syndicated columnist. This gave me some initial confidence, and the contents of the book only made me more satisfied that this was a book with valid advice -- so important when it comes to financial advice.

CREDIT MANAGEMENT KIT FOR DUMMIES provides considerable basic but practical information about credit reporting and credit repair which is likely to be particularly useful to those who are new to establishing credit and checking their credit reports. Those of us who have been dealing with credit-related issues and receiving our credit reports for years may only need to skim some of the chapters, and to only read in full the ones that address our particular concerns. Author Steve Bucci discusses in detail a wide variety of concerns in 23 chapters which include such topics as: understanding credit scores, credit reporting, protecting and building credit, dealing with negative credit, creating a spending and savings plan, and polishing credit reports. He also includes chapters pertaining to working with collectors and lawyers, and dealing with credit in relation to financial emergencies, mortgages, bankruptcy, and identity theft. The book ends with chapters on ten tips - ten consumer protections, ten tips for achieving stellar credit, and ten ways to successfully manage financial emergencies. Although he is sometimes repetitious (e.g. check your credit reports several times a year!), Bucci's writing is well-organized, easy to understand, specific, and oriented toward practical action. Personally, I most benefited from the dozens if not hundreds of web site links and agency listings which he recommends, since differentiating the reputable resources online from the unreputable ones is not an easy task.
