To grow your business in today's economy, you need a strong online presence. But what does that entail exactly? Marketing is no longer about mass-market advertising and outbound sales; it's about capturing demand – grabbing the attention of people already looking to make a purchase or acquire specific knowledge. To do that, your content needs to be at the top of Internet search results. Many businesses and marketers toss up a brochure-style website, do a little social media and blog posting (if any), and think they're "doing SEO" – but that's not what it takes to get those coveted first page Google rankings. No longer just another tactic, search engine optimization has become a full-blown channel on par with PR and advertising – one you can't afford to ignore. From website designers to business owners, marketers to entrepreneurs, everyone can benefit from understanding and applying SEO best practices. John Jantsch, author of the best-selling Duct Tape Marketing and creator of the Duct Tape Marketing System, and Phil Singleton, an experienced SEO consultant with years of experience at the local, regional, and national levels, have teamed up to provide you with the only Internet marketing guide you need. In *SEO for Growth*, they teach you how to leverage the new rules of search engine optimization to make sure your website gets found online. Jantsch and Singleton harness the knowledge they've acquired through years of experience and extensive research, explaining SEO in a direct and accessible manner, to help you navigate this complex technical terrain with purpose and ease. *SEO for Growth is Your One-Stop Digital Marketing Guide*

Customer Reviews

Hi I'm Douglas Burdett, host of The Marketing Book Podcast and I'd like to tell you about the book "SEO for Growth: The Ultimate Guide for Marketers, Web Designers & Entrepreneurs" by John Jantsch and Phil Singleton. Do you know the best place to hide a dead body these days? I'll tell you at the end of this review. I never would have thought I'd get so fired up by a book about search engine optimization, but SEO for Growth did it. Here's why - SEO has changed a lot recently and so there are a lot of lingering misperceptions about what you need to do to get your company to show up on the first page of a search engine. Plus there is a staggering amount of money being paid to a lot of SEO firms and experts that is wasted. In fact, a lot of that work being done is actually causing harm to their clients. In the book, the authors talk about how they have seen grown men cry when told that their brand new website is virtually useless and that it may need a total redesign to achieve their SEO goals. Hearing the same story over and over again motivated

Jantsch and Singleton to do something about it. They wrote this book. The book explains that the world of website creation is split into two camps: the old way of designing for "good looks" and the new way of designing for lead generation. And one of the most important things you need to succeed in SEO now is to provide original, remarkable content that your prospects are looking for. SEO For Growth is like the scene in "The Wizard of Oz" when Toto pulls back the curtain on the mysterious and all powerful Oz. For too many businesses, SEO has been perceived as Oz.
