Customer Reviews

Drawing has always been something I've wanted to master, but could never quite figure out how to simplify the process. In *Drawing with Charcoal For Beginners*, my questions have been answered. The authors of this book begin by showing the newbie artist how to draw spheres, cones, cubes and cylinders. They then demonstrate through step by step instructions just how to use these shapes to create pictures. There are oodles of illustrations in this book to help the new artist master each step. The use of shading to make a picture life-like is well detailed. Drawing eyes and mouths have always been a mystery to me. Most facial features that I have ever drawn, all end up looking the same. John Davidson and Paolo Lopez de Leon have decoded that mystery for me. If drawing portraits, animals and landscapes is something you aspire to do, then *Drawing with Charcoal For Beginners* is the book for you. I found this book enlightening and would definitely recommend giving it a read.

This is a really good guide on how to draw. It's about drawing with charcoal but really, you can learn how to draw with a pencil with this book. This book takes you step by step through many different types of illustrations. It teaches about lighting and shading too.

This is a great book with good information for anyone drawing and painting with charcoal. My only reason for not giving it five stars, is because, like a so many tutorial art books, it immediately advises tracing and transferring the image, instead of teaching how to draw in a natural way, unaided, if we all worked this way, no one would ever learn how to draw or develop their own style and the art world would be a sadder place for it.

This book is part of a series and it is expected that you have read the introductions which are not in this book. I was not aware of this in the initial description .
